Pipe Repair Packers DN50–1500 Model Range | Reliance Trenchless

Source of truth:
https://reliancetrenchless.com/products/repair-packers
Contact: https://reliancetrenchless.com/contact · sales@reliancetrenchless.com

How to use: Match measured ID, defect length, access, and bypass need to Series (Standard / Bypass / Long_lateral / Long_on_wheels). Pressure limits are per model — do not assume one bar rating for every packer.
Do not confuse with: Not Instant-Lock SLP sleeve packers; not inflatable sealing plugs (MS/SS/TP).

Confirm dimensions, materials, operating limits, inspection documents, availability and delivery terms with Reliance for each project.
