How to use: Match measured internal diameter to the nominal size. Catalogue common max inflation 2 bar / max back pressure 1 bar. Brochure DN300–6000 / 1–30 m water-sealing text is broader than catalogue rows — use model rows for selection.
Do not confuse with: Not multi-size MS/MSBP plugs; not testing plugs TP; not repair packers.

Confirm dimensions, materials, operating limits, inspection documents, availability and delivery terms with Reliance for each project.
